How to prevent **Ebola** Virus contamination

Always wash hands using water and soap

Avoid unnecessary journeys to Ebola outbreak zones

In case of fever, immediately go to the nearest health facility

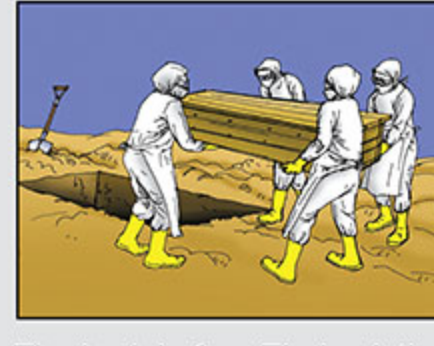

Avoid touching bodily fluids of people who have a fever

Any animal should not be touched when dead

Don't touch the body of an Ebola victim and don't bury the victim yourself

The burial of an Ebola victim should be done by protected and trained people only

A completely healed person can no longer transmit the virus of Ebola
